You can see peer review process section for more information via <http://ijssom.com/journal/process>

If the article is accepted, authors will be asked to provide the source files of the figures. Each figure should be supplied in a separate electronic file. All figures should be cited in the paper in a consecutive order and figure caption should be cited under the figure. Figures should be supplied in either vector art formats (Illustrator, EPS, WMF, FreeHand, CorelDraw, Word, PowerPoint, Excel, etc.) or bitmap formats (Photoshop, TIFF, GIF, JPEG, etc.). If a bitmap image has labels, the image and labels should be embedded in separate layers.

- **Tables**

Tables should be cited consecutively in the text. Every table must have a descriptive title and if numerical measurements are given, the units should be included in the column heading. The explanation of the table must be written above it.

- **Article Structure**

The text of the article should include the following:

- **Title:** as short as possible, with no abbreviations or acronyms.
- **Abstract:** This section should be succinct, with no subheadings, approximately 100 words, maximum 200.

- **References and Notes:**

IJSOM uses the short reference system for citations in the text with a detailed alphabetical list at the end of the article. For example 'Morse (2000) suggests ...' or 'Morse and Boyle (1995) found that ...' or 'A study of economic change (Boyle and Morse, 1982) has shown that ...'

References should be made only to works that are published, accepted for publication (not merely 'submitted'), or available through libraries or institutions. Any other source should be qualified by a note regarding availability. Full reference should include all authors' names and initials, date of publication, title of article, title of publication (italics), volume and issue number (of a journal), publisher and form (books, conference proceedings) and page numbers.

* Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full.

The references formats are as follows:

- **Appendix**

If the work contains more than one appendix, identify them as A, B, etc. Formulae and equations in appendices must be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on.

- **plagiarism**

IJSOM has a policy of screening for plagiarism, it means whenever you paraphrase, summarize, or take words, phrases, or sentences from another person's work, it is necessary to indicate the source of the information *within your paper* using an internal citation. It is not enough to just list the source in a bibliography at the end of your paper. Failing to properly quote, cite or acknowledge someone else's words or ideas with an internal citation is plagiarism.
